Penerapan Jurnalisme Data pada Media Olahraga dalam Jaringan “Panditfootball.com”: Studi Deskriptif Kualitatif Mengenai Penerapan Jurnalisme Data pada Sub Menu Analisis di Media olahraga dalam Jaringan “Panditfootball.com.” Pembimbing utama Pandan Yudhapramesthi, S.Sos., M.T. dan pembimbing pendamping Achmad Abdul Basith, S.I.Kom., M.I.Kom. Program Studi Jurnalistik, Fakultas Ilmu Komunikasi, Universitas Padjadjaran.

Tujuan penelitian ini yakni untuk mengidentifikasi beberapa hal yang mendasari penerapan jurnalisme data yang dilakukan media dalam jaringan *Pandit Football*, kebijakan penerapan, proses pengaplikasian jurnalisme data, hingga implikasinya terhadap cara elemen redaksi memandang sepak bola. Peneliti menggunakan teori mediatisasi yang dikemukakan Jesper Stromback dan konsep mediasi dari Denis McQuail. Peneliti menggunakan metode penelitian kualitatif dengan pendekatan studi deskriptif.

Hasil penelitian menunjukkan, *Pandit Football* menerapkan jurnalisme data untuk mengedukasi masyarakat dalam memahami sepak bola melalui pembahasan topik yang lebih mendalam. *Pandit Football* juga memaksimalkan potensi *big data* sebagai alternatif pendapatan, baik secara institusional maupun individu. Namun demikian, mereka masih menghadapi beragam masalah seperti kurangnya sumber daya manusia di dalam redaksi dan rendahnya kesadaran masyarakat dan mayoritas pelaku olahraga di Indonesia tentang pentingnya data. Permasalahan ini mempengaruhi proses jurnalisme data dan proses mediatisasi.

Peneliti menyimpulkan, *Pandit Football* berperan dalam mengungkap realitas sepak bola yang tidak dapat diperoleh dari liputan biasa dan juga dapat memberi makna pada topik yang tidak utuh. Peneliti menyarankan *Pandit Football* untuk memaksimalkan *big data* dengan membuat produk jurnalistik data di luar berita, serta mengembangkan kreativitas dengan menggunakan berbagai teknik visualisasi data lainnya untuk mendukung keberlangsungan media.

Kata kunci: Jurnalisme Data, Mediatisasi, Media Massa, *Pandit Football*, Studi Deskriptif

ABSTRACT

PRIMAGUNG DARY RILIANANDA, 210110130066, 2020.
The Implementation of Data Journalism in Online Sports Media Panditfootball.com: Descriptive Qualitative Study About the Implementation of Data Journalism on Analisis Submenu in Online Sports Media Panditfootball.com. Pandan Yudhapramesthi, S.Sos., M.T. as the main advisor and Achmad Abdul Basith, S.I.Kom., M.I.Kom. as companion advisor. Department of Journalism Studies, Faculty of Communication Sciences, Padjadjaran University.

This thesis aims to identify several aspect that related to the application of data journalism by Pandit Football including application policies, the implementation process of data journalism, and the effect of data journalism to the way the editorial elements perceive soccer. The Researcher used Mediatization Theory by Jesper Stromback and Mediation Concept by Denis McQuail, which is combined with qualitative research methods and descriptive study.

The results showed, Pandit Football applied data journalism to educate the public in perceiving soccer through a more in-depth discussion. Data journalism can also make this media preach a topic more deeply. Pandit Football also maximize the potential of big data in football as an alternative media income, both institutionally and individually. Nevertheless, they still facing problems, such as the lack of human resources in the editorial and the low awareness of the public and football elements in Indonesia about the importance of data. These problems ultimately affect the data journalism process and the mediatization process.

In conclusion, Pandit Football has a vital role in uncovering reality in football that cannot be obtained from regular coverage. This media can also give meaning to some incomplete topics. The researcher suggest Pandit Football to maximize football big data to make data journalism products outside of the news such as in-depth research, and develop creativity by using various other data visualization techniques to support the sustainability of the media.
